The Origins of the

Universe and Life

*Every word in the 6 day **Genesis** creation account describes the origins of the universe and life on earth, and every discovery and observation by science leads to understanding of when and how the universe came to be, often in seeming contradiction to **Genesis**.*

They can't both be right, or can they?

*In this talk, we will compare what the **Genesis** creation account says happened and when it happened with the latest scientific discoveries relating to the development of the universe and the appearance of life on earth.*

We will then discuss how it all happened.

Visit our website to read more about our special guest presenter and author, *Daniel Friedmann*.
